

Drugs, Key Data 2015

OFDT, 8 p.
June 2015

Since 2007, OFDT has been publishing *Drugs, Key Data*, an overall perspective digest with the most recent and detailed facts and figures. This 6th issue, an 8-page document produced in 2015, is released today, 26 June, to mark International day against drug abuse and illicit trafficking. It provides the most relevant figures in order to measure and present a quick overview of the French drug-related phenomena in 2015.

This document summarises for the main substances the levels of use observed in the French population as a whole. Then, it provides detailed information on use, treatment, health and social consequences as well as trafficking data per product. When possible, trends in these areas are provided.
