

Tobacco smoking and tobacco cessation in 2015

*Memo, OFDT, 4 p.
February 2016*

The review on tobacco and tobacco smoking indicators in France brings together recent figures which vary in nature and origin. The annual 2015 review on tobacco has been drawn up from the monthly reports and presents them as a concise overview.

For the first time since 2010, French tobacco retailer sales have risen considerably, in a context where tobacco prices were not increased in France in 2015, and cross-border purchases generally appeared stable.
