

Psychoactive substances, users and markets in France in 2021. Assessment of developments in use and access to care, marked by the health crisis linked to Covid-19

*In a glimpse, OFDT, 2 p.
January 2023*

Tendances No. 154 looks back on the development of freebase cocaine use among the most vulnerable drug users and their difficulties in accessing care during 2021, a year marked by the measures taken in response to the Covid-19 pandemic. It reports on the distribution processes of 3-MMC and ketamine within techno party environments, then examines the evolution of consumption in the context of chemsex and its social and health-related consequences.
