

Cocaine: a booming market, developments and trends in France (2000-2022)

In a glimpse, OFDT, 2 p.

March 2023

Based on all the data available to date, this report traces the developments observed over two decades, from the 2000s until 2022, covering three aspects:

- the boom in cocaine markets across Europe and France;
- the spread of cocaine consumption - in the form of powder/hydrochloride salt or crack cocaine - and the diversification of users;
- the public health issues faced by the public authorities in the absence of medical treatment for addiction or substitution for cocaine.
